# STEPHANIE ADEOYE

stephaniemaadeoye@gmail.com | LinkedIn | GitHub | stephanieadeoye.com

## EDUCATION

**Morgan State University** **Expected: May 2028**
Bachelor of Science in Computer Science, Clara I. Adams Honors College **G.P.A:** 3.95/4.0
**Relevant Coursework:** Data Structures and Algorithms, Software Engineering with Gen AI, Algorithms & System Design with Gen AI, Computer Systems and Digital Logic, Discrete Structures, Calculus I&II
**Organizations:** ColorStack, National Society of Black Engineers, Rewriting the Code, Women In Computer Science, Reboot Representation

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, TypeScript, HTML, CSS,
**Frameworks and Databases:** React.js, Next.js, Streamlit, SQL(Postgres), Node.js, Supabase
**Tools and Libraries:** Git & Github, Google Cloud (GCP), NumPy, Pandas, Figma, Paper, Supabase, Docker, Firebase, Vercel, Cursor, Claude Code, Notion

## PROFESSIONAL EXPERIENCE

**SWE Research Intern** | *University of California San Diego* *June 2026 - August 2026*

- Built the mobile version of an interactive audio player with touch-gesture playback controls, and shipped "Interactive Mode", a transcript interface built in **JavaScript and the Web Audio API** that replaced blind timeline scrubbing with word-level navigation
- Redesigned the web app's mobile interface to make its core playback features usable on small screens by prototyping interactions in **Figma** to test the user flow, then consolidating a cramped control bar into a compact dropdown and fixing an illegible transcript layout
- Improved real-time playback responsiveness on mobile by cutting per-update DOM work from O(n) to O(1) through cached element lookups and resolving a decay-timer race condition that was silently disrupting gesture and pause behavior

**Advanced Computer Science Tutor** | *Morgan State University* *August 2025 – Present*

- Tutoring students in 5+ courses one-on-one and in groups, including **Calculus, Algebra, Remedial Math, Data Structures & Algorithms, and Intro to CS**, breaking complex problems into clear, step-by-step solutions
- Helped **80% of repeat tutees (3+ sessions) earn an A** by tailoring explanations to each student's skill level and learning style
- Developing and leading monthly collaborative study programs and connect students, including student-athletes, to campus resources to improve academic confidence and retention

**Web Developer Intern** | *Crownherit Multiresources* *October 2022 – September 2023*

- Supported the integration of third-party payment services such as **Flutterwave** and shipping solutions to streamline online transactions.
- Applied foundational skills such as **HTML** and **CSS** for website product updates and maintaining a seamless user experience.
- Assisted with website content by editing text and images using CorelDRAW, ensuring images aligned with site branding.

## PROJECTS

**Clippey**

- Developed a Chrome extension that tracks and stores clipboard history to solve macOS's lack of native clipboard management, utilizing JavaScript, **HTML/CSS, and Chrome API**s to enhance user productivity generating over **8 users**
- Designed scalable storage architecture using Chrome local and sync storage APIs as well as a user-friendly interface using Figma and custom CSS, improving user experience and streamlining text capture workflows on MacBooks

**ColorStack Mock Lab**

- Building a full-stack platform **(Next.js, TypeScript, Supabase)** to let ColorStack members give and receive free technical and behavioral mock interviews, using a credit-based exchange system to incentivize peer-to-peer practice
- Designing a transactional credit-based booking system and Row Level Security policies to enforce interviewer/interviewee access rules

## LEADERSHIP AND INVOLVEMENT

**Vice President, Corporate Sponsorships** | *MorganHacks* *April 2025 – Present*

- Managing outreach and corporate sponsorships resulting in over $50,000 in funding and an overall increase of 40% in participant cash prizes and prize tiers compared to the previous 3 years
- Led a 3-person registration and transportation team to improve on-site participant registration by 20% and reduce transportation costs by 10%, directly enhancing the experience for 200+ hackathon attendees

**Outreach and Partnerships Coordinator** | *Morgan State Women In Computer Science (WICS)* *May 2025 – May 2026*

- Spearheaded sponsorship outreach efforts for Women in Computer Science (WiCS), securing over $5,000 in funding from corporate partners, and cultivating industry relationships to create mutually beneficial partnership
- Collaborated with other tech related organizations to increase attendance of Computer Science students at company events on campus
